# VestaTech

The first 2 challenges/flags explained

Letz CyberSecurityChallenge is a cool set of challenges created by weird folks from SECURITYMADEIN.LU in order to prepare a European wide competition.

Go on...

The goal is to create challenges on cybersecurity, but not only from a technical perspective.

AI enhanced Space Mining powered by Blockchain 5.0

Vestatech is smartly beyond

JOIN US!

We created a fake company with a complete story about space mining, fintech, and other cool things. It will be a long journey.

VESTATECH TASK FORCE PLATFORM
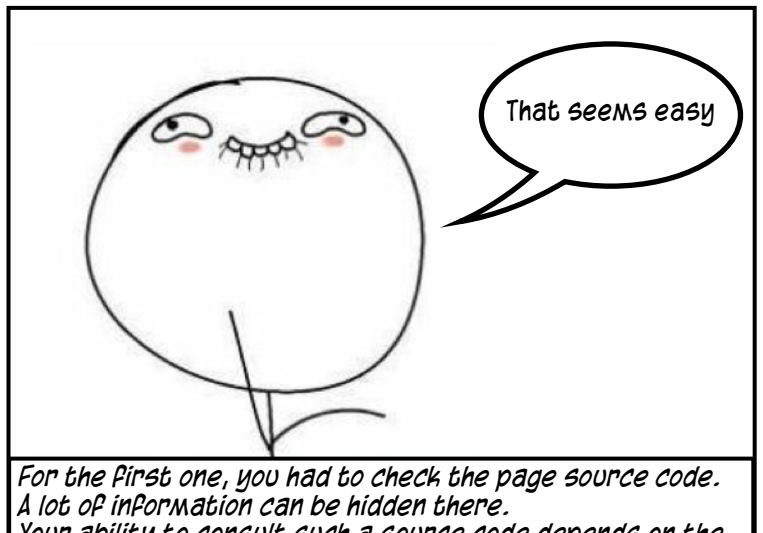

Registration Rules: You need a working email address & you must be between 13 and 25 years of age !

Register for the Task Force   Register via 🅕 #FACEBOOK

Have you got what it takes? Show us!

Scoreboard			
Complete list of 86 registered players and their performance.			
Position	Pseudo	Challenges solved	Coins earned
(1)	Neo		
(2)	SourceDiver42		
(3)		6	
(4)	Trigleos	5	

You can register if your age is in between 13 and 25 via...

https://vestatech.cybersecuritychallenge.lu
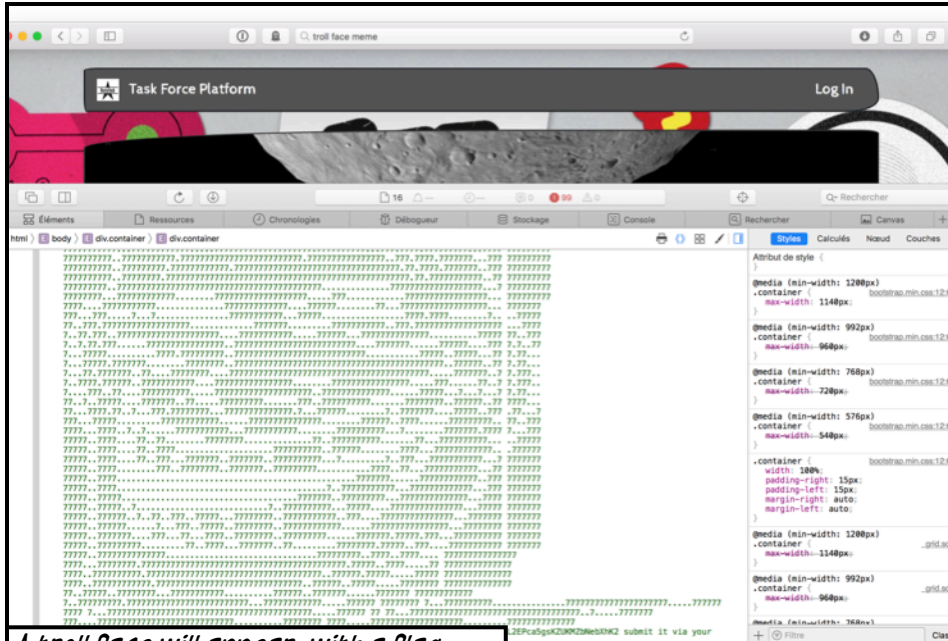

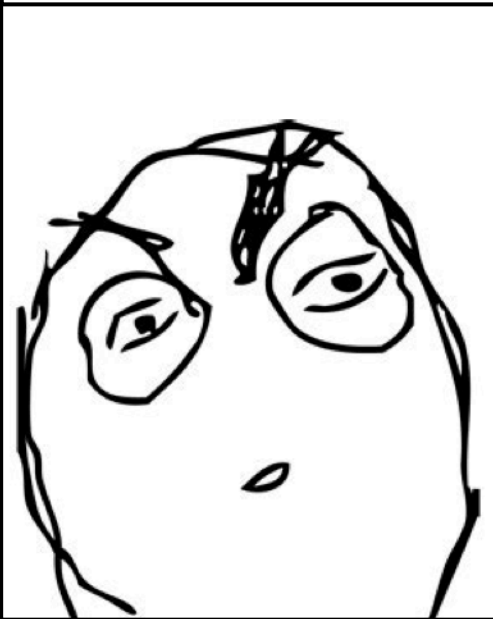

Finally...

Here are the first 2 Flags explained...

That seems easy

For the first one, you had to check the page source code. A lot of information can be hidden there.
Your ability to consult such a source code depends on the material and software you use...

So on the main challenge page, vestatech.cybersecuritychallenge.lu look at the source code.

A troll face will appear, with a flag mention (all typed as comments in the html page code).

and this comment has a flag for you: xZLZEPca5gskZUKMZbNebXhkZ submit it via your account

Just follow the instructions...
Btw, the code on the forehead of the troll face in the html source might be the key to another challenge not developed here....
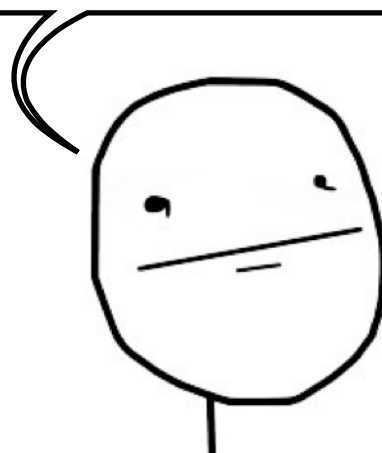

There you go, your first VestacCoin (an in game fake currency used for score).

The second Flag is in the privacy policy of the same web site.

Evil!

« Flag for a bonus | If you have been reading this far, please submit this flag jEpxm7aBThZGRUwDSmeWXNkCu for a bonus to your account. »

Soon a VestaCoin fortune will be mine!

You should always read the privacy policy... you never know what you could find in there... And now keep searching!

TO BE CONTINUED...
